

what's in your fuel?

one product with all these benefits

Preventative maintenance for all diesel fuel systems and storage tanks to protect your investment and maintain improved equipment reliability.

- Continuous "clean up" of fuel system to maintain durability and performance;
- Increase in fuel economy to help reduce the cost of driving;
- Associated reduction in emissions for reduced effect on environment and carbon footprint;
- Optimal lubricity levels to protect from premature wear of fuel systems components;
- Higher cetane levels for increase in combustion efficiency resulting in better starts;
- Unsurpassed anti-gel for more consistent winter startup and reliability;
- Does not need heated storage for effective handling in winter conditions;
- Bacterial activity to reduce tank sludge to maintain a better quality of fuel in storage;
- Meet Tier 1 for higher performance diesel fuel, similar to European standards for better overall reliability;
- Effective in biofuels including B20;
- Convenient packaging and treat rate - 1 litre to 1000 liters of fuel.

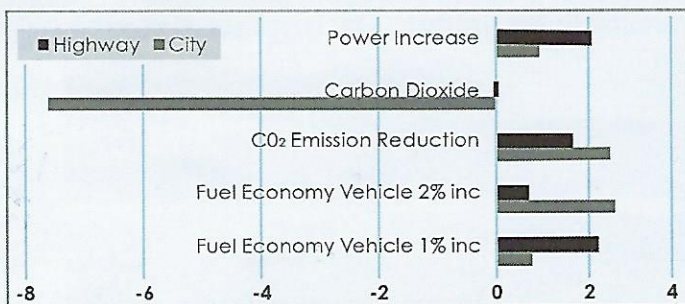

easy to use | less confusion | only one product required | convenient

BioCleans D-SYL offers "world class performance" at a fair price.

emission & performance

For year-round performance in ALL DIESEL ENGINES including farm, off-road, forestry, gen-sets and marine.
